For this activity, you will be exploring a data project's visualizations. Pick a data project from: https://pudding.cool/ or you can also identify a data project on your own.

As you explore the data project of your choice, you should address the following points (you can address them in bullet points):

- Title and link to your data project of choice
- Brief summary of the digital project you are exploring
- What are the objectives of the authors/researchers/scholars?
  - Is there sufficient context provided for the visualization?
- What strategies in visualization do they use to facilitate their objectives?
- Which was the most effective visualization?
- Which visualization would you make changes on?

Level-up component:
- Pick a data visualization from: https://viz.wtf/ and explain why it is not a good visualization

You may choose to submit this activity in a format that best works for you (e.g. word document, slideshow). Please use the MLA citation format for your sources, including the data project you are exploring. An example is available below:

Last name, First name. "Title of web page." *Name of website,* link of webpage. Accessed Day Month Year.
